Summary:

Highly motivated Frontend Developer with over 2.5 years of experience specializing in React and React Native technologies. Experienced in developing and deploying mobile applications using React Native, with hands-on expertise in building dynamic, user-friendly UIs. Currently focused on enhancing an e-commerce platform using React.js, optimizing front-end performance and ensuring seamless user experiences. Passionate about creating responsive, scalable, and efficient web and mobile solutions. Skilled in integrating APIs, state management, and implementing best practices for frontend development.

EXPERIENCE:

Front-End Developer, Apcomp Infotech Noida (09/2022 – Present)

- Proficient in React.js and React Native, building dynamic, responsive, and user-friendly web and mobile applications.
- Expertise in modern web technologies, crafting intuitive UI/UX designs, ensuring optimal performance across devices.
- Adept at implementing responsive layouts for cross-platform compatibility, improving accessibility and user experience.
- Hands-on experience with state management tools such as Redux, Context API, and others to enhance app functionality and performance.
- Strong knowledge of HTML, CSS, and JavaScript to create clean, maintainable code and seamless user interfaces.
- Cloud Services for Frontend Development: Actively studying cloud services related to frontend development, such as AWS Amplify, Firebase, and Azure, to enhance web and mobile app deployment, scalability, and security.

IT Support and Asst Team Lead (09/2021 – 08/2022)

- Application Monitoring and Support: Closely monitored applications running on the system and provided remote support to partners/clients to resolve issues.
- Customer Escalations: Effectively handled customer escalations, providing timely and accurate solutions to issues.

SKILLS:

- **Frontend Development** : React, React Native, UI/UX Design, HTML, CSS, JavaScript, Bootstrap, Next.js, Redux, Git.
- **Web Design & Development** : Responsive Design, Cross-Browser Compatibility, Mobile-First Design, Accessibility, User Interface Design.
- **Development Tools** : Git, Version Control, Visual Studio.
- **Testing & Optimization** : User Testing Tools, Performance Optimization, Code Quality & Debugging.

PROJECTS:

Cars360 Mobile Application

Technology Used : [React Native | Firebase | Laravel] | Dec 2023 - June 2024

Project Url : [cars360 Mobile App](#)

- Project Overview: Developed the Cars360 mobile application, aimed at providing Indian customers with an easy, hassle-free platform to purchase and sell used cars.
- Implemented secure authentication features for user sign-up, login, and profile management.
- Developed and integrated car listing pages, allowing users to view detailed information about various cars for sale.
- Built and integrated car filtering options, enabling users to search for cars based on make, model, price, year, location, and other parameters.
- Ensured the app was fully responsive, providing optimal user experience on various mobile devices.
- Utilized Redux for managing the application state, ensuring smooth and efficient data flow.

Apcommerce Admin Panel

Technology Used : [React JS| Tailwind CSS| Axios] | July 2024 - Till

- Designed and implemented an intuitive admin panel for an eCommerce platform using Vite, React, and Tailwind CSS.
- Integrated frontend API functionality to manage products, orders, and user data.
- Focused on responsive UI/UX design, real-time data interaction, and ensuring optimal performance and fast development using Vite for efficient bundling.

CRUD Operations with React

Technology Used : [React JS| Axios]

Project Url : [Crud React](#)

- Developed a full-stack CRUD application using React and Axios, integrating with a Fake API to simulate backend interactions.
- Implemented core functionalities for Create, Read, Update, and Delete operations, ensuring smooth data handling and state management.
- Demonstrated effective use of Axios for API requests and responses.
- Hosted and version-controlled the project on GitHub, showcasing hands-on experience in API integration, frontend development, and state management.

EDUCATION:

(2014- 2018)

B.E., Mechanical Engineering , RGPV University, Bhopal, India.
